

28 June 1983

MEMORANDUM FOR: Executive Assistant
Office of Personnel

STAT FROM:

[REDACTED]
HRPS

SUBJECT: Weekly Activities Report

I. A briefing, concerning the five year projection of Security Officer Age Groups, was prepared and presented to the Director and Deputy Director of Security. Security was particularly interested in the MARKOV modeling techniques that indicated that their recruitment targeting should result in an "ideal" age distribution for the next five years.

II. During the Comptroller meeting on 17 June 1983, DDI submitted estimates on Accessions and Attritions and FTP projections for the remainder of FY 1983. HRPS reviewed these data and discussed our findings with DDI/PMS/B&F. The HRPS major finding was that DDI's estimate of attrition severely understated its historical attrition rate by erroneously counting its transfer gains twice. Thus, DDI's FTP projections significantly over estimate its potential FTP usage for FY 1983.

IV. f.

III. Continuing projects:

- a. Review of Technical Attrition.
- b. Documentation of SAS programs.
- c. Support OGC jurimetric requests.
